## ISO 22301 Business Continuity Management System

Ensure continuity of critical business functions in the event of disruptions.

### Your challenges

In addition to the typical market risks that every business faces, unexpected disruptions can occur as a result of theft, natural disasters, disease outbreaks, terrorist attacks and other extraordinary incidents. Many companies lack effective backup systems and have poor resilience in the face of threats to their business operations. Due to insufficient planning and resource allocation for dealing with unexpected disruptions, these companies will incur increased costs when these incidents occur. Disruptions can cause a drop in quality and efficiency, which in turn will lead to a loss of stakeholder confidence.

### What is ISO 22301?

ISO 22301 is an international framework and benchmark that has been developed to guide businesses in identifying potential threats to a company's critical business functions and to build effective backup systems and processes to safeguard the interests of stakeholders. It specifies the requirements to plan, implement, monitor, review and

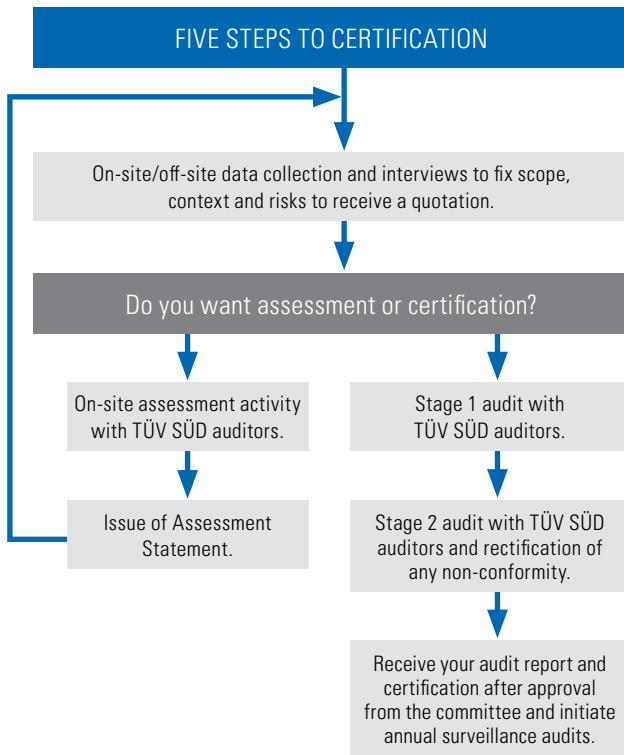

improve a company's business continuity management system, thereby minimising the impact of disruptions.

### Why is ISO 22301 important for your business?

ISO 22301 provides formal business continuity guidelines that will keep businesses operational during and following a disruption. It seeks to minimise the impact to products and services, ensuring they are still capable of being delivered or recovered promptly. The standard is applicable for companies of all sizes across any industry, particularly global companies operating in high risk or complex environments where the ability to function without delay is of paramount importance.

### How can we help you?

As an internationally recognised certification body with over 140 years of experience, TÜV SÜD offers training, auditing and certification services for the ISO 22301 Business Continuity Management System, better equipping your company to keep critical business functions running even during unexpected emergencies.

- **Gain a competitive edge** – by identifying and implementing optimisation of systems and processes.
- **Benefit from independent review** – with our independent and impartial rating of your organisation and its suppliers’ capabilities.
- **Benefit from a one-stop solution** – with TÜV SÜD’s comprehensive support, including training as well as integrated assessment and certification.

### Why choose TÜV SÜD?

TÜV SÜD is a leading global technical solutions provider, offering services in product testing, inspection, auditing and management system certification solutions. We are internationally accredited to provide ISO 22301 certification and have extensive office and laboratory infrastructure around the globe. TÜV SÜD’s dedicated and experienced experts possess the training, accreditation and experience to perform combined auditing exercises and can support you with proficiency in your local language and knowledge of the local market. Our auditors follow a strict code of conduct that assures you and your customers of our complete independence and professionalism. In addition, our TÜV SÜD certification mark provides you with international recognition and demonstrates your commitment to quality and business continuity.

### Add value. Inspire trust.

TÜV SÜD is a trusted partner of choice for safety, security and sustainability solutions. It specialises in testing, certification, and auditing services. Through more than 24,000 employees across over 1,000 locations, the company adds value to customers and partners by enabling market access and managing risks. By anticipating technological developments and facilitating change, TÜV SÜD inspires trust in a physical and digital world to create a safer and more sustainable future.

### Our ISO 22301 services

TÜV SÜD provides activities for assessment and gap identification to provide an independent point of view of the performance of your business continuity management. We offer auditing and certification services of business continuity systems, ensuring that clients are able to respond and recover from potential disruptive incidents. We offer business continuity system training for your staff according to international standards and benchmarks. Our services also cover periodical annual surveillance of business continuity management systems.

### The TÜV SÜD certification mark

CERT NO.: BCM-ISO22301-XXXX  
ISO 22301:2012

Our ISO 22301 certification mark demonstrates your company’s commitment to safeguarding critical business processes. The mark indicates that your backup systems and processes have been evaluated by one of the most recognised names in quality, security and safety.

### Your business benefits

- **Save money and time** – with a business continuity system that maintains quality and efficiency when incidents occur.
- **Minimise risk** – by implementing best practices, thereby avoiding loss of stockholder confidence.
